The Bureau of Budget and Management Research (BBMR) aspires to be a valuable resource by providing expertise and leadership in fiscal matters to all its stakeholders.

Mission Statement

To provide guidelines on organizational methods, policy execution, financial management and technical assistance to the various agencies and departments. To improve the planning, programming, and budgeting abilities of the government, through proper research and recommendations on all aspects of its operations. To ensure that all internal accounting and control systems are operated in accordance with policies, procedures, and laws. To provide advisory guidance to the Governor on policy development, program coordination, and planning and budgeting matters.

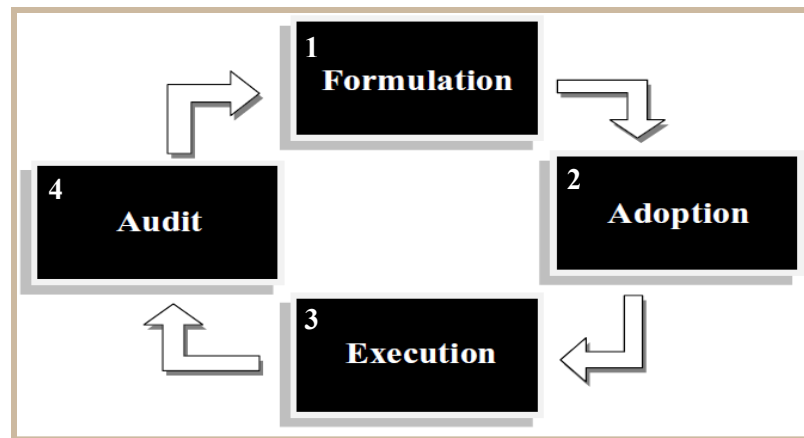

Strategic Goals / Objectives

- Provide guidance and direction to all government agencies on programmatic and budgetary matters.
- Provide the Governor and Legislature with information and support to effectuate and facilitate policy deliberations and decisions.
- Implement the Governor's programmatic and fiscal policies.
- Review and implement legislative mandates affecting budgetary and fiscal policies
- government-wide.
- Conduct ongoing review and evaluation of financial and operational controls of the Government.
- Implement Performance-Based Budgeting (PBB).

Budget Process

Four Essential Phases of the Budget Process

- 1 During the **formulation phase** the economic forecast and the program and financial plans are prepared for various GovGuam departments. Historical and latest economic data and statistics are utilized in developing projected revenue collections for the upcoming fiscal year. Upon completion of this phase emerges the *Governor's Executive Budget*.
- 2 The **adoption phase** is the process in which the legislature considers the Governor's Executive Budget proposal and after due consideration, passes overall Government of Guam revenue and spending plan under a General Appropriations Bill.
- 3 The **execution phase** involves the release and expenditure of funds appropriated per the General Appropriations Act. This phase includes the monitoring and assisting agencies in carrying out the approved budget while keeping in line with the established policies of the Governor.
- 4 The **audit phase** involves the evaluation of departments/agencies meeting their mission, goals, and objectives and to identify areas in need of improving compliance procedures with applicable laws and regulations.

Future outlook

Performance-Based Budgeting (PBB)

Upon the adoption of Performance-Based Budgeting (PBB), BBMR will relate government expenditures to measurable results and foster strategic planning and accountability. As mandated, the Bureau continues to support and promote PBB and serves as the lead agency in its implementation. Although several initiatives were instituted in past years, the Government of Guam has faced many obstacles in the successful execution of this approach to budgeting of government resources. In light of that, the Bureau will continue to work towards the successful implementation of PBB in improving essential government services.
